An inspiring event that brings together Canadian leaders in mental health

The Canadian Collaborative Mental Health Care Conference aims to advance collaborative practices in mental health, primary care, and community settings. It is a unique conference where all partners involved in mental health care can gather, learn together, and learn from each other.

This year our main conference theme is **Integration across the mental health care continuum from research to practice**. Our theme emphasizes the importance of building and strengthening integrated systems of care for people of all ages and across the diverse settings in which mental health and substance use services are delivered. The theme also highlights the need to bridge critical gaps between knowledge and practice and embed research within our systems of care in order to accelerate learning and improvement.

This conference is for everyone: healthcare providers and administrators, researchers, students, Indigenous persons, policymakers, community-based service providers, and persons, family members and caregivers with lived or living experience of mental health and/or substance use challenges. All are invited to participate and connect with a diverse and growing community that strives to remain at the cutting edge of practices and innovations that improve mental health and well-being in Canada and abroad.

Whether you are a new or return sponsor, we thank you for your interest for the conference. We hope to count you among our partners and see you in June!
